

1 of the outcome of the answers to the remaining  
2 questions.

3 DR..LIPICKY: That's fine.

4 CHAIRMAN BORER: Okay.

5 DR. LIPICKY: We can do that.

6 CHAIRMAN BORER: Let's move on.

7 DR. LIPICKY: But you've got to answer the  
8 questions.

9 CHAIRMAN BORER: That's what we're doing  
10 right now.

11 Five point two is adverse skin reactions.

12 DR. LIPICKY: Okay. Fine. so your answer  
13 to mortality was?

14 CHAIRMAN BORER: It's a labeling issue,  
15 and we'd like --

16 DR. LIPICKY: It's a labeling issue.

17 CHAIRMAN BORER: -- some more information  
18 of the specific nature that Steve and Paul have  
19 outlined, and Tom.

20 Okay. Are there sufficient data to  
21 conclude that Extraneal is safe with respect to  
22 adverse skin reactions?

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS

1 Anybody want to tackle that? Alan, do you  
2 have an opinion here?

3 DR..HIRSCH: I'm satisfied.

4 CHAIRMAN BORER: Okay.

5 DR. HIRSCH: That there is a relationship,  
6 but the safety is present. You've satisfied me that  
7 it's safe.

8 CHAIRMAN BORER: Okay. Anybody disagree  
9 with that?

10 How about peritonitis?

11 PARTICIPANTS: Safe.

12 CHAIRMAN BORER: Safe. Okay. Loss of  
13 membrane permeability, the issue that Dr. Brem raised  
14 earlier. Do you have any concerns about that?

15 DR. HIRSCH: NO.

16 CHAIRMAN BORER: Okay. Other adverse  
17 reactions that we haven't discussed here in this list?  
18 Anybody have any? Steve, no?

19 DR. LIPICKY: Did you see anything else  
20 that we should pay attention to?

21 DR. NISSEN: We've already talked about  
22 the hypertension.

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

1 CHAIRMAN BORER: Right. Okay. Now we'll  
2 go one by one. First, should Extraneal be approved as  
3 a peritoneal dialysis solution?

4 And we'll start at the left-hand side of  
5 the table. Dr. Kopp?

6 DR. KOPP: Yes.

7 CHAIRMAN BORER: Should Extraneal be  
8 approved as a peritoneal dialysis solution? You're  
9 saying yes?

10 DR. KOPP: Yes.

11 CHAIRMAN BORER: Okay. And let's go on.  
12 Maybe you can complete the answer.

13 If the answer is yes, which you've said it  
14 is, should labeling describe Extraneal as a dialysate  
15 similar in safety and efficacy to other dialysis  
16 solutions?

17 DR. KOPP: Yes, with regard to the 1.5 and  
18 the 2.5.

19 CHAIRMAN BORER: Okay. An alternative  
20 dialysis solution to be used only under specific  
21 circumstances? And if so, is that limitation for the  
22 use of Extraneal based on its enhanced efficacy under

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

1 specific circumstances, or is it based on increase  
2 safety concerns?

3 DR..LIPICKY: I've got to clarify that, I  
4 think.

5 CHAIRMAN BORER: Yes, okay. You can  
6 clarify it.

7 DR. LIPICKY: The notion is he said it can  
8 be approved. So now what is the perspective that it  
9 is going to be approved for?

10 One could say it's a dialysis solution.  
11 You can use it, but hardly ever, because I'm worried  
12 about its mortality and its blood pressure, its  
13 cardiovascular stuff, and then you should only use it  
14 as a long dwell and only for a couple of days, you  
15 know.

16 So okay. So that's restricting it because  
17 it is -- you have a worry.

18 The other is that it ought to really be  
19 unworrisome in another dialysate solution, but still  
20 long dwell because that's what it's designed to do the  
21 best, but then how are you going to tell people about  
22 that without giving them ultra filtration and stuff as

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

1 a claim in the labeling?

2 Or should it just be another dialysis  
3 solution? You can use this sometimes, and that's the  
4 nuance that's being looked for here, and obviously  
5 there's no clear answer, but just sort of looking for  
6 how you would lean on that.

7 CHAIRMAN BORER: Ray, how do we deal with  
8 the fact that the company has specifically requested  
9 an indication only for --

10 DR. LIPICKY: We don't care what they  
11 requested.

12 CHAIRMAN BORER: Okay.

13 DR. LIPICKY: You know, we give them what  
14 they get.

15 (Laughter.)

16 CHAIRMAN BORER: Okay. Dr. Kopp, do you  
17 want to with that clarification?

18 DR. KOPP: I'm more confused than I was a  
19 few minutes ago. But I think the data does suggest  
20 that there's some increase in ultra filtration. We've  
21 said that we don't know the clinical implications of  
22 that, but I think that should be laid out in the

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

1 packaging so that the clinician can see there is a 200  
2 mL difference and suggest that the appropriate use is  
3 for long dwell indications, but on a chronic basis.

4 I think the mortality and morbidity issues  
5 are sufficiently of low level enough concern that I  
6 think it's reasonable that somebody plan on using this  
7 on a regular basis. That's my take on it.

8 CHAIRMAN BORER: Alan?

9 DR. HIRSCH: Well, I might just second  
10 that. I was going to say just simply it's another  
11 dialysis solution and leave it at that, but I suppose  
12 like other studies we've looked at applied in a long  
13 dwell situation as you have presented to us.

14 CHAIRMAN BORER: Okay. Paul?

15 DR. ARMSTRONG: Well, you would understand  
16 my yes is conditional on Dr. Lipicky's reassurance on  
17 the data, the questions I've raised. But that being  
18 the case, then I would be yes, and I would answer the  
19 second part as has been answered.

20 CHAIRMAN BORER: Okay. JoAnn?

21 DR. LINDENFELD: I would say yes. I might  
22 like to say it would be indicated for patients who

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

1 need enhanced ultra filtration, and then expand that  
2 or make it more general when mortality data is known.

3 I mean, I'm still a little bit concerned  
4 about this mortality difference. I know the numbers  
5 are very small, but we only have one set of data, and  
6 that would be my answer.

7 CHAIRMAN BORER: Tom?

8 DR. FLEMING: I think my perspective is in  
9 line with what I've heard with my four colleagues, and  
10 I would certainly concur with exactly what Paul said.  
11 This is subject to the additional analyses that we  
12 have requested, several of the committee members have  
13 requested be done that relate to further exploration  
14 of the data on blood pressure and the data on  
15 mortality and cause of mortality and preferably in my  
16 view getting enhanced follow-up on mortality.

17 And as has been suggested, as well, with  
18 a plan for post marketing surveillance, but we might  
19 come back and discuss that later.

20 CHAIRMAN BORER: Okay. Mike.

21 DR. ARTMAN: Yes. I think it should be  
22 approved, and I would also favor, I think, what JoAnn

**NEAL R. GROSS**

COURT REPORTERS AND TRANSCRIBERS  
1323 RHODE ISLAND AVE., N.W.  
WASHINGTON, D.C. 20005-3701

1 said, that the indication may be for those patients  
2 who need enhanced ultra filtration because of these  
3 safety concerns.

4 CHAIRMAN BORER: Dr. Anderson.

5 DR. ANDERSON: Oh, yes. My answer is yes.  
6 I would strongly encourage that we look at the  
7 possibility of collecting additional data in the area  
8 of viscosity, systemic absorption, and metabolic  
9 products.

10 The whole blood pressure issue somehow  
11 bothers me because if I read the table correctly, it's  
12 the last data point on the table, and in my research,  
13 I would never stop at that. It's out of whack with  
14 the rest of it, and I would want to know what's beyond  
15 that.

16 CHAIRMAN BORER: Steve?

17 DR. NISSEN: I support approval, and I  
18 support approval to be used routinely in dialysis, and  
19 I would describe in the label the enhanced efficacy of  
20 ultra filtration. However, my support is contingent  
21 upon an appropriate post marketing program designed to  
22 explore the issues of hypertension and its

1 relationship to mortality.

2 Now, what form that takes, I'm not  
3 prepared to say at this point, but I do think that it  
4 just would be wrong to completely ignore a six  
5 millimeter blood pressure difference, given what we  
6 know about blood pressure and cardiovascular  
7 mortality. To just ignore it and wish it away I think  
8 would be a mistake for the agency and for the public.

9 CHAIRMAN BORER: Dr. Brem?

10 DR. BREM: I support its use as a long  
11 dwell alternative to existing solutions.

12 CHAIRMAN BORER: Okay, and I vote yes  
13 also, and I would echo exactly what Steve said and add  
14 the issue -- the other that we want to see the other  
15 data that have been mentioned by JoAnn and Tom.

16 Is that sufficient information, Ray? Are  
17 there any other --

18 DR. LIPICKY: That's fine.

19 CHAIRMAN BORER: Great. Well, thank you  
20 very much. We're all done.

21 Tomorrow morning we will be meeting again,  
22 and I believe it is at 8:30.

CERTIFICATE

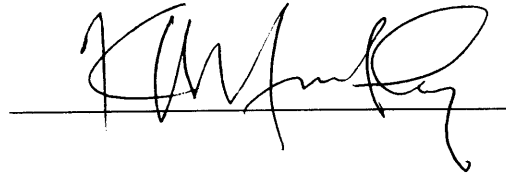

This is to certify that the foregoing transcript in the  
matter of: Meeting of the Cardiovascular and Renal  
Drugs Advisory Committee

Before: DHHS/PHS/FDA/CDER

Date: August 9, 2001

Place: Bethesda, MD

represents the full and complete proceedings of the  
aforementioned matter, as reported and reduced to  
typewriting.

A handwritten signature in dark ink, appearing to read "K. M. Funder", is written over a horizontal line.
